

Locomotive.

The engines are all in fair working order, and are doing well. The two new engines are doing much better than they were at first.

We have two engines in the shops for repairs, both of which will be out within a fortnight, when they will be ready for anything that may turn up.

Carriages and Waggon.

The carriages are all in very good order. The waggon was all thoroughly repaired before the wool season, and are in good order. The new sides and roofs are being put on to the low sided trucks; several have been finished and are running, and found to be a great improvement on the other covered trucks.

General Remarks.

Though the traffic for the year 1867 has fallen short of what might reasonably have been expected, this cannot be looked upon as in any way affecting the good prospects of the railway for the future, as this shortcoming is solely owing to the extraordinary circumstances already referred to.

The traffic is, in reality, increasing as fast as ever, and the good prospects held out by Mr. Banfield, in his report on the previous half year, are every day confirmed.

Acting General Manager.

MELTING DOWN SHEEP.

To the Editors of the Standard.

Gentlemen,

It is most gratifying to the well wishers of the sheepfarming interest in this country to learn from your columns that sheep estancieros are from north to south adopting the only means which will make the business money out of anything. What is the object of breeding stock?—Unquestionably, it is to realise the stock produced for the purpose of their products being utilised. The erection of steam vats and melting-down establishments in the camps and in towns conveniently situated for the purpose was the one thing wanting to set the ball rolling. The more sheep that are killed off now the better it will give the camps an opportunity of recovering from the effects of overstocking, and by retaining only the flower of the flocks of young ewes, the percentage of increase will be enormously augmented.

There will this year a very large sum of money realised by sheepfarms; there will be flocks to the hard dollar realised for each head of sheep slaughtered from this time forward—and the sheep that should be slaughtered should be counted by the million. Numbers of estancieros will, therefore, be in the position to reorganise their establishments, regulate their flocks, so as to have none but productive stock in them, and to take the measures which will ensure an improved progeny from them—a progeny which will give greater weight of fleece, and more grease and tallow—in a word, larger and better animals.

When men are in funds, they should employ these funds to advantage, and not put off doing that which is so much required in the interest of sheepfarming until too late, until they have frittered away considerable portion of such funds. Now is the season for work—for parting out their picked ewes and making them into flocks by themselves, the draft ewes, capones, &c., being taken to other pastures, and sold off as fast as they can be got into condition for slaughter. All rams should be taken out of the flocks, and the draft ewes, if their lambs are taken from them when about 4 months old, will rapidly fatten. The picked ewes which will be retained by the estancieros will, by taking the lambs off them in time, be in prime condition in the spring to put to really good rams abounding in health and vigor. Men would then see the big lamb lambs they would get from almost every ewe—for few, very few, will miss, if the ewes are in good condition when put to rams, and the rams of the right sort, and in high condition. In a very few years, by adopting this course sheep farmers will be able to jingle in their pockets "grease money" and "wool money," the likes of which will do their hearts good.

"Frizzle, frizzle, holl and bubble, Drying skins and melting fat—
There's the trick as well as the art."
Morning, noon, and night—
I am, sir, without more at present,
A GENTLE SHEPHERD.

CENTRAL ARGENTINE RAILWAY.

THE LAND QUESTION AT THE LAST MEETING.

The Chairman: I have the pleasure, gentlemen, to introduce to you Señor García, who represents the Government.

Señor García: I would beg the Chairman to translate this, because I cannot speak English sufficiently well. The following is a translation from the Spanish of the paper handed to the Chairman:

"Mr. Chairman—I much regret having to present myself for the first time at this meeting as the representative for the shares of the Argentine Government, without being in possession of the data concerning the same, which I hoped would have been sent to me by the last steamer."

"After my interview with you, Sir, in Paris in the month of December last, I wrote for instructions and explanations which have been of the greatest use to me to-day, but these papers have not yet reached me; which may be possibly accounted for in consequence of the resignation of Señor Rawson, the Minister, and the absence of Señor Costa, charged *ad interim* with the ministry of the Interior."

Until I receive those documents, I do not consider the position of the Government in order, for its name does not appear inscribed in the register of shareholders, but under the name of Mr. Wheelwright, which presents serious difficulties in the matter of voting."

"Thus I find myself only in a position to ask, in accordance with my instructions: 1st. That early and effective measures may be taken so as to prevent complaints and serious obstacles caused by the administration of the railway, as stated in a note communicated by the Government to the resident Director in October last, copy of which I have handed to you."

"2nd. To remind you that it being a principal condition in the donation of the lands, that they should be settled, it is urgent that this should be carried out."

"The Company has been for some time in possession of 25 leagues which have not been settled in conformity with its engagement."

"It is true that the Government should have handed over a greater number of leagues of land, and if it has not done so, it is owing to difficulties which as yet are not easily re-

moved, but are in a fair way of being so; still I do not see any reason that justifies the non-settlement of the others."

"In conclusion, I have to state that the Government desires to continue affording proofs of the interest it has given up to the present time, to an enterprise in which are compromised not only business matters, but others of greater importance to the Republic."

The Chairman: I can only repeat that we are perfectly sensible and fully alive to the point Señor García dwells on last, namely, the intention of the Government to assist us in the best possible way. They have already given us the most tangible proofs of it, and it must not be allowed to go forth that in anything I have said as I have implied their desire to assist us. I have only felt it due to the proprietors to place the facts before them. There can, however, be no doubt that we have been very much injured by the want of those portions of the land which we ought to have received long since; indeed, it has been suggested to us that we ought to forward protests to the Minister, in order that the Government should be made responsible for the injury and inconvenience we are suffering; but we are unwilling to disturb the good feeling that exists, and which I hope will continue to exist. The reason why the lands referred to by Señor García have not been colonised I have already given, and I am glad that Señor García has brought the matter forward, because it has given us an opportunity of explaining what our feelings are on the subject. I regret exceedingly that we should be placed in such a fix—if I may be allowed the expression. The reflection which has been made as to the non-payment of the £300,000 relates equally to the land; and the position of both is to be found in the same causes, but for which none of us are to blame. There have been embarrassments which none of us could have foreseen (Hear).

Mr. W. A. Holmes: With reference to the land account, I should like to call your attention to the fact that you have received power to expend £10,000. Now this is not a very large sum, and as it appears we have already spent £1,425 of the £10,000 in walking over the land and looking at it, and that nothing else has been done, I think it is necessary we should have had our resources. (Hear.) One gentleman says that the land already transferred, although small in quantity, is very useful, and could at once be made available by colonising it. I would therefore suggest that as the inspection of the land and travelling and miscellaneous expenses are gradually growing serious, that expenditure should cease, and that we should employ the money in sending out emigrants, which would be better than letting gentlemen appropriate a large sum in positively, I fear, doing very little. I have been connected with companies in which I have seen a great deal of money spent in this way and nothing to be seen of it. I beg to ask you therefore to see that this money, small as it is, be applied in sending out men from here, and that it be not spent in surveying and travelling. It seems to me that people merely walk over a portion of the land, and take out a tape and rod, and the money is spent and there is nothing to show for it.

The Deputy Chairman: If I may be allowed to say so, I think the honourable proprietor is complaining that we do not spend enough of the £10,000. Now, the reason so little has been spent, is that the portion of land we have got possession of commences at a distance of 70 miles from Rosario and extends only to Ensenada (San Geronimo) being in the middle of the area ceded to us; and it is not the portion on which it would be desirable for emigrants to commence to settle; until we get possession of the land next to Rosario, and which is the most valuable portion, and most likely to take with emigrants, we think it would be unwise to deal with a lot of land, which as we are informed, is anything but good. We believe that if the parties were sent out to that land they would be disappointed with it, and the whole scheme would be prejudiced thereby; that is the reason why we have not yet commenced. With regard to the sum of £1,425 which has been expended, the government ordered certain surveys to be made of the lands, and we of course had to pay our proportion of the surveys. I may add that we have spent no portion of the £10,000 in this country, and I think we act wisely in not taking further steps with regard to the land that we have got; we have not been backward, however, in taking steps to induce parties to emigrate, and have actually made arrangements to sell the league of land in the province of Santa Fé, which we have not got possession of, and 35 families are already settled upon it.

For Monday 116,000 57½
Saturday 22,500 57½
Sept 30th 90,000 57½
Total sales, 234,500.

Aside from the failure in question, the market was somewhat affected by a leading banker refusing to advance further on Bonds as collateral. At no previous period have there been so many Bonds in the Bolsa as at present, and many look forward to a fall when the new emission is made by the Government; but money is so abundant, and confidence so established, that the cash price of Bonds has really little to do with the market. The brokers rule the rates. There are millions and millions bought and sold on time, which have yet to be closed, and although the failure of a party to deliver Bonds which he sold short, should very naturally tend to drive up prices, yet it had the contrary effect, inasmuch as speculators began to think that it was time to close up all their transactions which showed a gain. The brokers and speculators have six weeks to do what they like with Bonds, after that time the busy season will set in, and these securities, probably, will then find their proper level. It is impossible to find out the exact amount of gains and losses on the month's liquidations; but very experienced parties consider that they are fully four hundred thousand patacons, which is a high figure for this market.

To-day, being the closing of the mails and the sailing of the packet, the attendance on "Chargé" was not very great. The Arno takes some specie, but we have not heard the amount. As regards the new Concordia Railway, we understand that Mr. H. A. Green is in no way connected with the project. The London and River Plate Bank is doing a large discount business, as also the Provincial Bank. Neither bank intend to alter the rate of interest.

A portion of the Parish quinta, facing the Palermo road, has been sold in the round sum of \$250,000 m.p.

Messrs. H. A. Green & Co., agents for the steamer Halley, announce that, in consequence of so much cargo being detained in the Boca for want of water, they will not despatch her until to-day (Thursday), at noon, and that letters will be received at the Captain of the Port's Office up to that time.

Mr. Hernandez, the well-known real estate broker, has favoured us with the following sales for August:

No. 4073 Estados Unidos, 8 x 50, small house, \$36,000 m.p.; L. Casallo, buyer.

Town Belgrano house, 19 x 50, sold to R. Machado, 70,000.

unequal points that become mixed or entangled during unwinding, thus rendering this operation almost impossible. Finally, the woman who made the cocoons from which the silks were obtained have not been properly destroyed.

In a case I forward by this steamer to the Minister for Foreign Affairs, I have enclosed a parcel addressed to you containing the residuum of the 2 skeins, yellow and white, that were tested; and the assayer's certificate, from which you will be able to see the considerable loss resulting from the experiment. There is also enclosed in the same parcel a hank of first class very fine French raw silk, worth to-day in Paris 155 francs per kilogramme, less 13 per cent discount, and I have to observe to you, that notwithstanding the great difference that exists between the French and Chilean silk, the latter will complete advantageously for the former, as soon as the Chilean spinners acquire the necessary skill and experience, for the first hanks of raw silk from Broussa, which to-day gives such magnificent results, were at the commencement as defective as those you have sent me.

I have sent to two Lyons and Nimes spinners a kilogramme of our seed in order to make further assays, and I shall advise you opportunely of the result obtained.

The cards of seed have arrived in very good order and I shall soon know the prices offered by the southern serialists for the lot.

F. FERNANDEZ RODELLA.
To the Minister of Finance, Santiago.

ON CHANGE.

August 26, 1868.

Ounces 400

Sovereigns 122½

Patacons 25

National Bonds 56½

This was a very exciting day on 'Change. Bonds opened heavy, owing to a collapse in the liquidation-room. One broker failed to make good differences, which are roughly estimated at 48,000 patacons. For the moment the affair had its effects, but as it is the general interest of all parties in the Bolsa to sustain the market, it is thought that it will not very seriously injure Bonds. The broker in question has given up the name of his client, who, it appears, is a man of good property, and a barruquero. It is to be hoped, therefore, that all will be satisfactorily arranged at the meeting which is to be held to-night.

The failure in question, if not followed by others, will rather serve the market than otherwise, inasmuch as it will tend to steady it. The gains during the last few days have been too heavy for this place. Wealthy men, as a general rule, do not speculate in Bonds, and others find it difficult to make good such large differences. The cash sales of Bonds amounted to only 5,700, at 56½. In the liquidation-room, at after-hours, they fell somewhat, and the market closed flat.

For Monday 116,000 57½
Saturday 22,500 57½
Sept 30th 90,000 57½
Total sales, 234,500.

Aside from the failure in question, the market was somewhat affected by a leading banker refusing to advance further on Bonds as collateral. At no previous period have there been so many Bonds in the Bolsa as at present, and many look forward to a fall when the new emission is made by the Government; but money is so abundant, and confidence so established, that the cash price of Bonds has really little to do with the market. NAVARRA RACES.
ON 14th SEPTEMBER, 1888.
[Open to the English-speaking Community—
viz., English, Irish, Americans, &c.]

FIRST RACE—ONE O'CLOCK.
THE AMATEUR STAKES—Distance, 10
squares. Weight of riders, 145 lbs. Entrance,
\$200—\$500 added.

SECOND RACE—TWO O'CLOCK.
THE NAVARRO SWEETSTAKES—Dis-
tance, 20 squares. Weight of riders, 145 lbs.
Entrance, \$200—\$500 added.

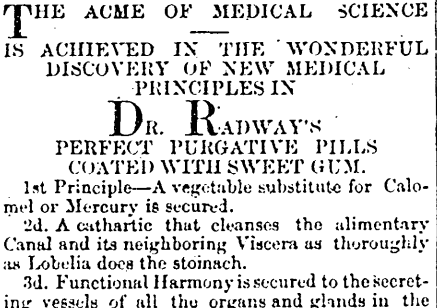

THIRD RACE—THREE O'CLOCK.
THE NAVARRO CUP—Distance, 20 squares.
Weight, 150 lbs. The Cup must be won two
years in succession. Entrance, \$200. The
winner of this race will be given to the
winner of the next year's race.

RULES.
1st. Horses entered must be the bona fide pro-
perty of foreigners.
2nd. Any rider convicted of unfair riding
shall have his Horse placed last.
3rd. Each Race shall be started with a flag,
and not more than three parties allowed when
the Horses are brought together for the start.
4th. Gentlemen Riders are required in all the
races. Entries must be made on or before the
1st of SEPTEMBER, in writing, giving name,
number, and name of Owner of Horse, and en-
closing Entrance Money.
Letters can be addressed, in Buenos Ayres, to
Mr. T. DUGAN, 11 de Septiembre; or to Mr.
T. FALLON, 66 Piedras; and in Camp, to Mr.
EDWARD CASEY, Navarro.
The Committee, in order to encourage a large
Entry of untried Horses in the Races for the
Navarro Sweetstakes and Amateur Stakes, have
resolved that Horses which have Run for the
Santo and Navarro Cups last year shall not be
allowed to Run in the Races.
5th. Entries of Horses made on the Ground
the Day of the Races will be \$200 in each case.

THE MOTHER'S FRIEND
MRS. WINSLOW'S
SOOTHING SYRUP FOR INFANTS.
This most valuable Preparation, discovered by
Mrs. Winslow, has been used in thousands of
cases in which Infants have suffered from the
effects of Teething, Colic, and Diarrhoea, and
always with the most brilliant success.
Having received a large Consignment of this
valuable Syrup, we offer it to the Public, being
sure that it only requires a trial to recommend it.

THE ACME OF MEDICAL SCIENCE
IS ACHIEVED IN THE WONDERFUL
DISCOVERY OF NEW MEDICAL
PRINCIPLES IN
DR. RADWAY'S
PERFECT PURGATIVE PILLS
COATED WITH SWEET GUM.
1st. Principle and valuable substitute for Calomel
or Mercury is secured.
2d. A cathartic that cleanses the alimentary
Canal and its neighboring Viscera as thoroughly
as Lobelia does the system.
3d. Functional Harmony is secured to the secreting
vessels of all the organs and glands in the
system.
4th. Purification and equalization of the circula-
tion of the blood.
5th. The properties of these Pills communicate
a nutritious principle to the blood and reparative
secretions.
6th. A great want is supplied in their soothing,
healing and expulsive power in cases of intestinal
ulceration, as in Eruptive Fevers, where a
cure depends upon free evacuations.
7th. The aged and persons suffering from paraly-
sis of the bowels, by the use of one pill per day,
secure regularity.
Persons suffering with any disturbance of the
secretory organs, or that have difficulty in dis-
charging the contents of the bowels, or that are
in the habit of taking Pills or opening medicines,
should try one box of these truly excellent Pills.
The happiness of their effect on the system, and
the satisfactory evidence one box will give you of
their wonderful curative powers, will convince
you that your faith and trust in them will become
firmly established.

REGULATING PILLS.
A newly discovered principle in vegetable medi-
cation is secured in Radway's Regulating
Pill, that places them far in advance of all other
Purgative or Cathartic, Aperient, or Sedative,
and all Bile-Medicines. They are the only
vegetable substitute for Calomel or mercury
known; the only Medicine that, during their
process of purging, imports nutriment to the de-
bilitated system, and strength, vigor and purity to
the blood, and imparts secretions; the only pur-
gative that will cleanse the Alimentary Canal
and obstructed intestines as quickly and thorough-
ly, without weakening or molesting the pa-
tient, as Lobelia (the most active and thorough
emetic of the herbs) will the stomach, and the
only purgative at present known safe to admi-
nister in cases of Yellow Fever, Erysipelas,
and other Malignant Fevers, that inflame
and ulcerate the mucous membranes of the
Bowel, Stomach, &c.

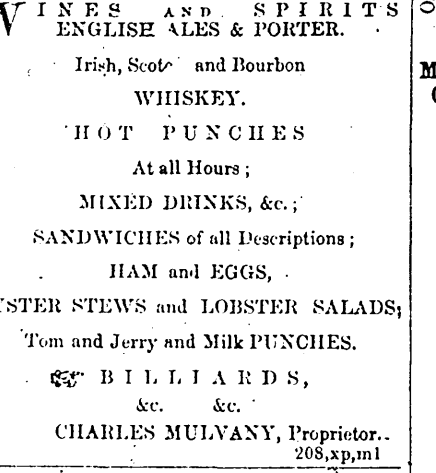

**THE PROPERTIES OF
DR. RADWAY'S PILLS.**
They equalize the circulation, Purify the Blood,
and remove Corrupt and Anomalous Humors,
and retained deposits from the system in six
hours.
AS A CATHARTIC, the increase, when sus-
pended, the periodic movement of the bowels,
and promote a quick evacuation of its contents.
Their influence is extended throughout the system,
purging the retained deposits in the stomach,
the duodenum, stimulating the secretory
ducts of the pancreas and liver, in the promotion
and increase of the flow of bile and pancreatic
fluids.
PURGATIVES of common aloe exert their
action on the colon and rectum by irritation of
the mucous membrane, without influencing the
liver or its secretions. Such cathartics are un-
satisfactory for general use. The common Ca-
thartic Pills, that induce drastic liquid discharges,
should never be given in cases of inflammation
of the alimentary passage, against the irritant
and acid humors of the fauces.
THE NUTRITIOUS AND TONIC properties
of these Pills of great service in depleting fevers
and uterine discharges, likewise as a dinner pill,
to increase the appetite and promote digestion.
THEIR SEDATIVE properties allay pain in the
nervous system, stomach and bowels, either
from inflammation, colic, flatulence, wind,
cramps, &c.

THEIR COUNTER IRRITANT influence
extends throughout the system where there is infla-
mmation, congestion or irritation, stimulating the
blood and nervous fluids in the congested vessels,
and equalizing its circulation. The principle of
Counter Irritation is generally applied to external
remedies. Its application, internally, in the
form of a purgative medicine, exemplified in
Radway's Pills, has produced a wonderful curative
principle, readily withdrawing from the blood
and fluids their acid and irritating humors.
AS DIAPHORETICS OR SUDORIFICS they
stimulate the secretions of the skin, induce ex-
halation of obstructed perspiration.
THEIR DIURETIC properties act on the
kidneys, correcting and regulating the flow of
urine.
THEIR ANTI-BILIOUS properties stimulate
the liver in the secretion of bile, and its discharge
through the biliary ducts. In all cases of Head-
ache, Dizziness, Bilious Attacks, Stomachic dis-
turbance, Indigestion, caused by the overflow
of bile and its mixing with the blood, these pills
in doses four to six, will quickly regulate the ac-
tion of the liver and free the patient from these
difficulties. One or two of Radway's Pills taken
daily, by those subject to bilious pains and torpor-
ity of the liver, will keep the system regular and
insure healthy digestion.
In case where there is severe inflammation, paraly-
sis of the bowels, and a speedy discharge of con-
tents required, grind six of the pills to a powder
and take in some preserves or water. In half
an hour the pills, given in this way, will have
their effect. In cases of biliousness, where it is
necessary, in two hours. We have known the
pills, given in this form, to open the bowels when
Croton Oil, Elixirum, P. diphylloph. M-drake
&c. failed. It is seldom that a second dose will be
required in these cases of Intestinal Obstruction.

SOUTHERN CAMPS. To be Disposed of,
The Owner being about to leave for Europe,
Two Thousand Five Hundred fine Merino Sheep,
crossed with French Rams, with the right of Pasture
on a Suerte of Estancia. The Land is the
best quality for the Breeding of Sheep Stock, and
is situated 75 leagues south of Buenos Ayres.
The Post town lies within a league of the Camp,
where there is a regular communication with the
city twice a week in winter, and three times in
summer. The Land can be obtained on the same
terms as held by the present Tenant—viz.
Rent Free, until such time as the Titles are made
secure, with the right of purchaser afterwards.
A fine River runs through the Property. It is an
Party having only a small capital at command
this is an opportunity that seldom occurs.

PENEDO'S VEGETABLE SYRUP,
THE GREATEST MEDICAL DISCOVERY
OF
MODERN TIMES!
HAS CURED THOUSANDS!**

**FAREWELL, A LONG FAREWELL, to Consumption, Affections of the Chest, Hooping-
Cough, Chronic Bronchitis, and Asthma.**
All sufferers from these dangerous Diseases will experience immediate relief even in the most
desperate cases.
Several eminent Members of the Medical Profession, whose testimony may be relied upon with
the most perfect confidence, have obtained the most satisfactory results in cases of Consumption by
the use of this valuable specific—in fact,
**THE SYSTEM OF THE PATIENT UNDERGOES A COMPLETE
TRANSFORMATION.**
Professor PENEDO feels assured that the above-mentioned discovery will always maintain a
large superiority over all other Preparations, as it is generally known that these invariably contain a
large quantity of mineral matter, which is most harmful to the human frame.
This SYRUP is prepared solely from one of those valuable vegetable productions for which the
surrounding Country of the Brazil is so justly famed.
The annexed Testimonial has been received, and is one of many thousands, testifying to the
medicinal virtues of Penedo's Syrup:
"Professor J. A. PENEDO.
"HONORABLE SIR,—In answer to your Correspondence, allow me to inform you that my
Lady has used the Preparation, called "Penedo's Syrup," and by its assistance, she was in an
credibly short time completely cured of the Pulmonary Disease from which she was suffering.
"Allow me to assure you that you have my best wishes for your future success, and I shall be
happy if you will make whatever use of this letter that you may think proper.
"Sincerely yours,
"City of Porto Alegre, May 30, 1869."

SAVINGS BANK.
BANK MAU & CO.
101—Cangallo—103.
BUENOS AYRES.
The immense advantage of Accounts Current
are now so generally felt and appreciated in the
two great emporiums of the River Plate, Mon-
tevideo and Buenos Ayres, that there are very few
Merchants who fail to keep one at the bank in
which they place the most confidence.
The Bank of Mau & Co. in Montevideo has
already provided for the working classes in that
city a safe and profitable depository for their
savings.
The sums deposited in that very important in-
stitution are daily increasing, and already reach
a very large amount.
These advantages have not hitherto been en-
joyed in this city by an immense number of clerks,
artisans, working men, and servants of all classes
and conditions, who are equally interested in put-
ting their savings out at interest, thus providing
themselves with a reserve fund in case of need,
sickness, or old age, instead of spending them in
the immoral gambling, in lotteries, and other
frivolities.
The Bank of Mau & Co. of this city, following
the noble example of their firm in Montevideo,
now offer the same facilities in this city, and has
opened a Savings Bank at No. 103 Calle Cangallo
from Nine a.m. till Three p.m. every day, for the
receipt of the savings of the classes already
mentioned. Sundays and holidays excepted.
The Bank will deliver to each depositor a pass
book, in which will be entered the amount de-
posited and withdrawn.
The depositor is permitted at any time to with-
draw the whole or part of the sum deposited; in
the former case the interest will be calculated up
to date.
The Bank of Mau & Co. is sufficiently known to
the Public by the benefit derived from the
course of its operations, which are regulated on
the strictest and soundest principles, and always
directed to promote the general welfare.
The Bank of Mau & Co. are also persuaded,
that this new branch of their business will render
immense service to the working classes of Buenos
Ayres and its neighborhood.
Buenos Ayres, 2nd January, 1867.
P. P. MAU & CO.,
M. A. DE FREITAS AMORIM.

CONDITIONS.
First—The Bank receives at interest any sum
from Twenty-five Dollars currency or one Silver
Dollar upwards.
Second—The interest allowed is six per cent.
(6 p. c.) per annum, which is liquidated every
six months.
Third—The depositors can at any time retire
the whole or part of the money deposited.
Fourth—Once the money deposited exceeds
twenty-five thousand dollars currency, or one
thousand dollars silver, the depositor, if he wishes
can open an account current, according to the
rules established by the bank.
Fifth—In case the depositor loses his pass book
it can be replaced by another on paying two
dollars currency, and advertising the loss in the
public newspapers.

THE "GLYCERINE" DIP,
FOR SHEEP AND LAMBS,
FREE FROM ARSENIC, MERCURY, MINERAL AND OTHER POISONS.
DEADLY TO ALL PARASITES INFESTING THE SKINS
OF SHEEP AND OTHER ANIMALS.
This PREPARATION is destined to supersede the Compounds hitherto advertised, and which
have a tendency to destroy Animals, injure the Men engaged in Dipping, and weaken the Wool by
their caustic and reducing properties.
The "GLYCERINE" DIP can be used with perfect safety at any Season of the Year, and has
been found in practice invaluable for the following purposes:—
I.—In Curing Scab, Killing Acari, Fogs, Ticks, and other Parasites which attack the Sheep.
II.—In strengthening and adding lustre to the Wool.
III.—In Washing Sheep shortly before Clipping, leaving the Fleeces in a pure state.
IV.—In Dipping Lambs, even whilst suckling ewes, as they cannot be injured by the Material.
V.—In Dipping Rams at any Time of the Year, without danger of producing the excoarations
which always follow the use of other Dips, especially in the Autumn Season.

Kemp's Vegetable Worm Pastilles.
I certify that I have for many years been
physician in the Hospitals of this city, and have
had occasion to test the effects of "Kemp's Worm
Pastilles." My experience causes me to con-
sider them one of the best remedies for the ex-
pulsion of Worms. They are safe and effective,
both for children and adults.
MIGUEL DE ZAYAS, M.D.
Puerto Principe, Cuba, Nov. 1, 1882.
I certify that I have prescribed, on different
occasions in my civil practice, "Kemp's Worm
Pastilles" with good results. I consider them an
excellent specific in the diseases produced by
Worms. Their pleasant taste and small size are an
important virtue in prescribing them for
children.
FRANCISCO GOICOECHEA,
Professor of Medicine and Surgery, and
Chief Medical Director in the Military
Hospital, Bolivar City.
Venezuela, July 1883.
I certify that I have many times prescribed
"Kemp's Vegetable Worm Pastilles," and always
with the same satisfactory results, for all kinds
of Worms. They are easily administered, and are
a safe remedy in such diseases.
FRANCISCO CASALS, M.D.
Matanzas, Cuba, May 10, 1882.
I certify that "Kemp's Vegetable Worm Pas-
tilles" is one of the most efficacious remedies for
removing and destroying Worms. I was for a
long time a sufferer from those dangerous vermin,
but the "Pastilles" have effectually relieved me,
and my health is now entirely re-established. I
shall always strongly recommend this most agree-
able of medicines.
LUIS FLORES.
Lima, May 28, 1882.
KEMP'S VEGETABLE WORM PASTILLES
Are safe for the most delicate child. They
never fail in removing all kinds of Worms, and
according to directions.
